Paint Kitchen

SPRA CUBE SE MEDIUM EFFICIENCY

RP Paint Arrestors are disposable paint overspray collectors that efficiently trap paint solids before they reach the exhaust stack, also known as a paint booth filter. These were the first dry filters specifically designed to control paint overspray. Through the years, these high efficiency and high capacity paint booth filters have proven to be a cost effective, efficient way to handle virtually every overspray requirement. Fabricated of slit and expanded paper, or slit and expanded paper with polyester, the multiple layers of RP Paint Arrestors are assembled so the intake side has larger openings than the exhaust side. This provides depth loading for maximum service life.

US Blast offer all types of filter material, Booth Coat for the walls, floors, LED Upgrades and service repairs for your Paint Equipment NEEDS!

Call 817-330-4564 for Quick Service!

FILTER

AMERICAN MADE AIR QUALITY SOLUTIONS
Protecting People, Facilities and Environment
